

AMR Smart Lifebuoy Version II

The future of Lifesaving is here.

simple

fast

safe

People die from drowning every year.

Over half of all drowning casualties are under the age of 25

Drowning is one of the 10 leading causes of death

There are approximately 42 deaths by drowning every hour of every day

Males are twice as likely to drown as females

Drowning rates in low and middle-income countries are over three times higher than in high-income countries

Designed to save lives in the water, the AMR Smart Lifebuoy Version II is a self-propelled, remote-controlled rescue device. With a smart, U-shaped hull, the AMR Smart Lifebuoy Version II's two electrical turbines will operate regardless of which side is up when it is thrown into the water.

Compact (80cm x 100cm) and lightweight (13kg), with a powerful battery pack as well as constant induction charging, the AMR Smart Lifebuoy Version II is always ready for action. The device can operate at over 15kmh and is designed to handle the most demanding sea conditions. Its sophisticated navigation and guidance system enable better control, and simple intuitive usability means firsttime operators can immediately perform a rescue.
