TOTAL NAVIGATOR KTN-70A / KTN-70AF

Easy to operate

Operation key

By using both single function keys and shortcut keys, you can quickly learn how to operate KTN-70A / 70AF.

Various presentation modes

The screen width of the Echo Sounder image can be adjusted from 30 to 70% on the screen of Plotter / Echo Sounder. (KTN-70AF only)

Other ship track display

By connecting to a Radar with ATA function, up to 50 others' tracks chased by ATA can be seen in the display. You can customize settings such as color and type of track for each ship in the display.

AIS display function

As KTN-70A / 70AF has a built-in AIS receiver, by connecting to an Antenna, up to 400 AIS symbols can be seen in the display. You can check how AIS-equipped ships move in the display, which makes your voyage safer.

Compass and data display

The graphical display enables you to determine easily where you go and how the wind blows*. You can check information about the waypoint such as the distance, the direction, the route and ETA.

*Wind data input required

Waypoint and route display

By connecting to a Radar, waypoint destination and route can be transferred to the Radar. By comparing the Radar and the Plotter displays, you can more easily determine the position relation between the waypoint and route.

Save important data in your SD card

You can save data such as Waypoints, Marks, Tracks, Other Ship's Tracks, Routes, Drawings and Beacons in a general SD card as well as the internal memory. You can transfer the data to the other KTN-70A / 70AF. It is recommended that you save important data in your SD card.
